

ANTON BUEV

✉ donanthonywins@gmail.com  github.com/soapkelele

SKILLS

Programming: Python, SQL, TypeScript, HTML/CSS

Frameworks: Aiohttp, Aiogram, Koa, React

Technologies: Docker, Git, Linux, L^AT_EX

Languages: English (Advanced, C1), Russian

EDUCATION

Higher School of Economics

2017 – 2021

Bachelor's degree. Applied Mathematics.

Moscow

Higher School of Economics

2021 – Present

Master's degree. Applied Mathematics.

Moscow

EXPERIENCE

@surfwaybookingbot | Python, MySQL, Redis, Docker, Metabase

February 2021 – Present

A Telegram bot for booking surf classes

Commercial project

- Automated booking surf classes, buying certificates, creating deposits
- Designed a calendar showing dates of surf classes using Telegram native buttons
- Redesigned database to make it scalable
- Integrated payments solutions
- Connected a CRM system to keep track of clients and their orders
- Made a messaging system to send clients notifications
- Set up pages displaying stats using Metabase

This bot helped to make 5000+ booking of classes, 3000+ sales of certificates, 3000+ leads in the CRM system

@workoutybot | Python, PostgreSQL, Docker, TypeScript

November 2020 – Present

A Telegram bot for saving workouts and weight measurements

Pet project

- Made functionality for saving workouts and weight
- Designed a webpage showing weight graph
- Wrote a post which brought me 2000+ users which are still coming because that post is ranked high in Google search (vc.ru)
